

Now more than ever,
you're redefining how
you work and do business.

Microsoft and Surface are committed to providing customers with the technology solutions they need to improve productivity, efficiency, and security. We are here to help organizations navigate and overcome hurdles throughout unprecedented times of change. That's resilience at work.

Remote teamwork

Resilience is sustaining productivity during challenging times. Work remotely, stay secure, and prevent meeting fatigue with Microsoft 365 and Surface.

- Make more human connections with colleagues and customers on Microsoft Teams video calls
- Collaborate effectively across essential apps
- Stay connected with 4G LTE when Wi-Fi is unreliable

Security anywhere

Resilience is adapting to an ever-evolving work environment while keeping your business secure. Learn how Surface keeps you protected.

- Surface endpoint protection
- Safeguard data with removable SSD*
- Stay secure from chip to cloud
- Keep data secure with Microsoft 365 Conditional Access

*Hard drive is not user removable. Hard drive is only removable by skilled technician following Microsoft provided instructions.

Modern management

Resilience is enabling your organization to work from anywhere when you most need it. Deploy, manage, and stay secure everywhere with Surface and Microsoft 365.

- Remotely deploy and configure devices in a zero-touch process right out of the box
- One-click device management
- Deploy virtual desktops and apps to enable secure remote work with Windows Virtual Desktop
