

DevOps with GitHub on Microsoft Azure Advanced Specialization

Program Overview and Requirements

Program overview

Showcase your organization's capability providing customers secure software development practices using DevOps principles and using Azure and GitHub solutions with the DevOps with GitHub on Microsoft Azure advanced specialization.

As the speed of business accelerates, your customers are looking for better, faster, smarter ways to develop and deploy software and automated processes. They're moving away from traditional waterfall development and embracing iterative development and delivery tools that help shorten time to market.

Partners who earn an advanced specialization will get a customer-facing label displayed on their business profile page and be prioritized in customer searches in the [Microsoft Solution Provider Finder](#).

[Learn more about advanced specializations](#)

What are the requirements?

Eligible partners must meet the highest standards for service delivery and support. All requirements will be verified by Microsoft and/or a third-party vendor, either automatically or by manual review, and are subject to change.

Requirements	Details
Related competency	Your company must have an active Gold Cloud Platform competency.
Performance	USD10,000 average monthly Azure consumed revenue (ACR) from the last three months, aggregated from at least three customers. OR Two MSX engagements (not leads) under DevOps with GitHub in the "Commit (stage 3)" or higher, in the last 12 months.
Knowledge	Your company must have at least three individuals certified with Azure DevOps Engineer Expert. GitHub certification verified through an audit to be added in January 2022.
Audit	Your company must pass a third-party audit. View audit checklist.

How do I apply?

Only administrators of an organization's Microsoft partner account can submit an application for the DevOps with GitHub on Microsoft Azure advanced specialization on behalf of the organization. If you have the appropriate role and access, you can apply by signing in to Partner Center and navigating to your Partner Center dashboard > Competencies > Advanced Specialization.
